

Firewise Black Patch Stove Putty is a heat-resistant repair compound designed to fill holes, cracks and gaps in wood heaters, solid fuel stoves, fireplaces and barbecues. With excellent adhesion and heat resistance up to 1400°C, it creates strong, durable seals to help prevent smoke and gases from escaping, restoring smoke-tight joints in high-temperature applications.

Ideal for sealing flues, grates and joints, as well as securing fibreglass rope seals in stove doors. Its smooth, workable consistency makes it easy to apply, shape and fill damaged areas. Drying in 24 hours, Black Patch provides a practical, long-lasting repair solution to help maintain the performance and efficiency of heating appliances.
