HOT SPOT READY TO USE MORTAR

Firewise Hot Spot Ready-to-Use Mortar is a pre-mixed, heat-resistant mortar designed for installing firebricks and repairing cracks, gaps and joints in fireplaces, wood heaters, chimneys, pizza ovens and BBQs. With excellent adhesion and heat resistance up to 1400°C, it helps create strong, smoke and gas-tight joints in high-temperature applications.

The convenient, ready-to-use formula eliminates the need for mixing, making installation and repairs quicker and easier. Suitable for both indoor and outdoor applications, Hot Spot Mortar dries in 24 hours and provides a durable, sandstone-coloured finish. Available in 500g, 1kg, 4kg and 30kg sizes to suit everything from small household repairs to larger installation projects.
